## Management Considering Additional Actions to Improve the Balance Sheet

## II . Financial Structure Improvement Plan

# Rationale for the Financial Structure Improvement Plan

- Hanon Systems' financial stability has been deteriorating for years due to declining profitability, driven by worsening business conditions, inflation, and continued investments in xEV
- Following a change of the major shareholder, the company has been implementing operational efficiency and profitability. As a result, substantial improvements are beginning to be realized from 2Q 2025
- The company plans a capital increase to maintain its credit ratings, strengthen its financial structure, and protect corporate value, supporting sustainable growth by accelerating operational improvements
